

DIDSBURY PIONEER

VOL. X

DIDSBURY, ALBERTA, WEDNESDAY, JULY 31st 1912.

No. 31

PERSONAL ATTRACTIVENESS

People are measured from their feet up quite as often as from their heads down.

Probably the most noticeable parts are your feet.

Therefore add to the attractiveness of your personal appearance by wearing "INVICTUS" shoes.

This season's shades in "INVICTUS" tans are more varied and attractive than ever—the 1911 "INVICTUS" Oxfords being exceptionally "natty."

J. V. BERSCHT.

R. C. Robertson's

Everybody is doing it.
Doing what?

Why, buying their Fruit and Groceries from Bob, the only live grocer in town.

Come with the crowd.

All my goods are fresh. Try them and see BOB.

AROUND THE TOWN

Rob. McGinn of Coronation is in town for a few days' visit.

Mr. and Mrs. Levi Snyder left for a visit to friends in Ontario on Monday.

N. Welcker left last Friday with a big shipment of cattle for Vancouver.

Mrs. (Rev.) D. Marshall and her sister, Miss M. Carleton, left last week for a visit to friends in Lloydminster.

Mr. and Mrs. W. Mowers are making all preparations to remove to Sibbald, Alta., this week.

Mrs. McKennie and Miss Violet and Miss Lettie Colvin are visiting with their mother and brothers at Munson, Alta..

Rev. Dr. Dyke, principal of the Presbyterian college at Strathcona, will preach at the Knox Presbyterian church, Didsbury, on Sunday, August 11th.

Mr. H. E. Sands, accountant at the Union Bank, returned from his holidays, which he spent at Winnipeg, on Tuesday.

Miss Edna Gairnor, who has been visiting her friend, Miss Mary Osmond for the last two weeks, returned to her home in Calgary on Wednesday.

Mr. G. M. Gaddes of the Gaddes-Johns real estate company of Calgary and a former resident of Didsbury, was a visitor in town for a few days this week.

On and after Sunday, August 4th, a fortnightly morning service will be held in the English church, the Rev. Thorold Eller of Crossfield officiating.

Watch for posters for a lawn party to be held on Mr. Moyle's lawn next Thursday evening under the auspices of the Methodist Ladies' Aid.

Mr. Geo. B. Beckley, agent for the Sangers European shows, was in Didsbury on Wednesday making arrangements for the show to visit this town on August 14th.

The editor and Mrs. H. E. Osmond returned from their trip through the Kootenay district on Tuesday evening. What was seen and what we think of the country visited will be published next week as it is too late for this issue.

The "Gentlemen of Didsbury" held a very enjoyable dance and "at home" on Tuesday evening in the Opera House. The committee who had charge of the affair are to be congratulated on their efforts in providing such a splendid time for those who attended.

Mr. J. Lang of Trochu, formerly of Didsbury, is returning to Didsbury with his family and no doubt he will be welcomed back by his many friends in the town and district. Mr. Lang has accepted a position in W. Miner's barber shop.

The Didsbury junior baseball nine went to Westcott on Tuesday evening to play a friendly game with the juniors of that thriving burg. The home team were treated to a good time and

Children's Day

The annual Children's Day programme of the Evangelical church which, owing to circumstances, was formerly postponed, will be rendered next Sunday afternoon at 2 o'clock.

Preparations to this effect have been made by choir and children. All are cordially invited to attend.

MARRIED

FARLEY-SMITH—On Saturday, July 13th, 1912, at Crescent Heights church, Calgary, by the Rev. H. M. Shore, Miss Violet Smith, daughter of the late Richard Smith and Mrs. Charles Brown of Westcott to Fred Farley of Calgary.

BORN

LINDQUIST—On Saturday, July 27th, 1912, to Mr. and Mrs. E. Lindquist, a son.

an excellent supper and were trimmed by the Westcott team to the tune of 11-7, so were pretty well satisfied that the Westcott boys were a pretty good bunch. A return game will be played at Didsbury on Wednesday evening.

Rev. Orris of Westcott kindly took charge of the meetings, both morning and evening, at the Baptist church on Sunday, and gave two fine services, which would undoubtedly have been better attended had there been previous notice of the same published. Miss Alice Kerr, an earnest and enthusiastic missionary worker from the east, will conduct services next Sunday at the usual hours, 11 a. m. and 7.30 p. m., to which all are cordially invited.

The destruction of the house fly is a public duty. Almost every American State Board of Health is carrying on a crusade against him. His filthy origin and habits, and the fact that his body is generally laden with disease-producing germs, makes him one of the greatest enemies of the human race.

If the housekeepers of Canada will use

WILSON'S FLY PADS

persistently, this peril will be tremendously reduced.

Language and Religion

The man who tells this story claims that its hero was an Irishman. At any rate, the language makes a fine bull.

A preacher had delivered his prize sermon, exhorting his hearers to embrace the religious life and scorn the attractions of wealth and late suppers.

He concluded with this concise shot: My brethren, let not this world rob you of a peace which it can neither give nor take away.

Unlike a Brick

What goes up must come down said the Sage.

How about the high cost of living? asked the Boob.

Washington to St. Louis

Have you made any sacrifice to demonstrate your patriotism? I have, replied the St. Louis man. I bet on the home team regularly.—Washington Star.

An Oil of Merit.—Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the curative qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

The Champion Magazine Reader

Philander C. Knox, the secretary of state, is an omnivorous reader. He subscribes to more than fifty magazines. In addition to this, he buys all the new books and all the rare editions of old works that he can get his hands on. At his bedside he has an adjustable electric light and a contrivance of his own patent which, like a tray, holds a large volume while he reads it.

SUFFERED EVERYTHING

For Years, Restored To Health by Lydia E. Pinkham's Vegetable Compound.

Canadian women are continually writing us such letters as the two following, which are heartfelt expressions of gratitude for restored health:

Glanford Station, Ont.—"I have taken Lydia E. Pinkham's Vegetable Compound and never found any medicine to compare with it. I had ulcers and falling of womb and doctors did me no good. I suffered dreadfully for years until I began taking your medicine. I also recommend it for nervousness and indigestion."—Mrs.

HENRY CLARK, Glanford Station, Ont.

Chesterville, Ont.—"I heard your medicines highly praised, and a year ago I began taking them for falling of womb and ovarian trouble.

"My left side pained me all the time and just before my periods which were irregular and painful it would be worse. To sit down caused me pain and suffering and I would be so nervous sometimes that I could not bear to see any one or hear any one speak. Little specks would float before my eyes and I was always constipated.

"I cannot say too much for Lydia E. Pinkham's Vegetable Compound and Liver Pills, for there are no medicines like them. I have taken them and I recommend them to all women. You may publish this testimonial."—Mrs. STEPHEN J. MARTIN, Chesterville, Ontario, Canada.

W. N. U. 909

Comment on Current Fashions

This happened when the tight and hobbled skirt, which is regarded by some as a revelation in anatomy, first came into fashion in the national capital. A smartly dressed woman, who was right there with the hobble, rang the bell of a fashionable home in Connecticut Avenue, and inquired for her friend the lady of the house.

Bridget, a new servant, took one look at her, and demanded indignantly.

"Sure an' where is your card?"

The visitor explained that she had forgotten her cardcase, whereupon Bridget went to her mistress and announced that a person wanted to see her.

"Who is she, Bridget?" asked the mistress.

"It can't be no friend of yours, said Bridget, with disdain. 'Sure an' she is standing out there in the street in her shape."

Minard's Liniment Cures Diphtheria.

Big Feet

The police inspector's face turned scarlet with rage as he rated a raw Irish recruit for his awkwardness.

Now, O'Connor, you'll spoil the line with those feet. Draw instantly, man, and get them in line!

O'Connor's dignity was hurt. Please, Inspector, he drawled solemnly, they're Pat Murphy's in the rear rank.

FEARFUL HEADACHES

STOMACH BAD, NO APPETITE, WAS LOSING WEIGHT AND STRENGTH

Wonderful Change, When Health Was Restored by

DR. CHASE'S NERVE FOOD

Headache is a symptom and not a disease in itself. It acts as a danger signal to warn you of serious trouble. By reading Mr. Donneral's letter you will be satisfied that there is no treatment to be compared to Dr. Chase's Nerve Food as a means of building up the system and removing the cause of headaches, sleeplessness and indigestion.

Mr. Charles Donneral, Kleinburg, Ont., writes: "I wish to communicate to you the great cure which I received from Dr. Chase's Nerve Food. For over two years I suffered from fearful headaches, my appetite was always poor, and the stomach bad. I took medicines from physicians, but the headaches persisted, and I was rarely free from them.

"Reading about Dr. Chase's Nerve Food, I began using it, with little idea that I would be benefited. I had become thin and weak, but the very first box helped me, and with continued treatment I have been cured and feel like a new man. The headaches have disappeared, my appetite is good and digestion excellent. I write this letter in hope that other sufferers from headache may use Dr. Chase's Nerve Food and be cured."

Dr. Chase's Nerve food, 50c. a box, 6 for \$2.50, at all dealers or Edman-son, Bates & Co., Limited.

Soothing

She—What was it the choir just sang?

He—From the appearance of the congregation I think it must have been some kind of a prodigy.

Gabe—Has Jones a good memory? Steve—Should say he has. Why, he can name you the last six vice-presidents of the United States.—Cincinnati Enquirer.

I bought a horse with a supposedly incurable ringbone for \$30. Cured him with \$1.00 worth of MINARD'S LINIMENT and sold him for \$85.00. Profit on Liniment, \$54.00.

MOISE DEROSCE Hotel Keeper, St. Philippe, Que.

She Had the Last Word

They were quarrelling—as usual. Of course, dear, he said, sarcastically. I don't expect you to be an angel. No, darling, she cooed, you would be awfully lonesome if I were.

A Safe Pill for Suffering Women.—The secluded life of women which permits of little healthful exercise is a fruitful cause of derangements of the stomach and liver and is accountable for the pains and lassitude that so many of them experience. Parmelee's Vegetable Pills will correct irregularities of the digestive organs and restore health and vigor. The most delicate woman can use them with safety, because their action, while effective, is mild and soothing.

Safe Anyhow

Professor—The average American girl is poorly educated.

Girl Graduate—You think so?

Professor—Yes, but there is one consolation, the average American boy will never find it out.—Satire.

LET MOONEY DO IT

NO BURNED BREAD
NO SCORCHED BISCUITS

MOONEY'S PERFECTION SODA BISCUITS

are the great favorites for every day use.

They are made in the big sanitary factory in Winnipeg and come to you in air-tight packages or in sealed tins as you prefer.

"LET MOONEY DO IT"

Will you be one of the 108 farmers who will receive our Prize Contest checks?

THERE will be twelve cash prizes in each of the nine provinces (108 in all) in the 1912 Prize Contest for Canadian Farmers. The 1911 Contest was so successful in awakening interest in the use of Concrete on the farm, that a second contest, in which three times as many prizes are offered, was decided upon for this year.

The Contest this year is divided into three classes, "A," "B," and "C," and there will be four prizes in each class. (First prize, \$50; Second prize, \$25; Third prize, \$15; Fourth prize, \$10.) Thus there are three \$50 Prizes, three \$25 Prizes, three \$15 prizes, and three \$10 Prizes, for each province.

DESCRIPTION OF CLASSES

In Each Class there will be First, Second, Third and Fourth Prizes (\$50, \$25, \$15, and \$10) for Each Province.

CLASS "A"—Prizes to be awarded to the four farmers in each province who use most "Canada" Cement on their farms in the year 1912.

CLASS "B"—Prizes to be awarded to the four farmers in each province who send photographs of the best concrete work done with "Canada" Cement on their farms in 1912.

CLASS "C"—Prizes to be awarded to the four farmers in each province who send in the best description, telling how any piece of concrete work was done with "Canada" Cement. (Entries for this prize must be accompanied by photographs of the work.)

Don't think that you must use a large quantity of cement in order to win a prize. The quantity of cement used does not count in Classes "B" and "C." Many of last year's prize winners used very little cement.

When you enter the Contest, you have a chance to win a cash prize of \$50 as well as the certainty that you will add a permanent improvement to your farm. If you haven't a copy, be sure and ask for our book, "What the Farmer Can Do With Concrete." It will not only suggest many improvements that you can use in entering the Contest, but will tell you all about the use of concrete on the farm.

Just write your name and address on the attached coupon, or use a postal card, and we will send full particulars of the Prize Contest and a copy of "What the Farmer Can Do With Concrete" to you absolutely free.

Canadian Over All

By Dr. Drummond

Our fathers came to win us
This land beyond recall.
And the same blood flows within us.
Be it Britain, Celt or Gaul.
Keep alive each glowing ember
Of our Sireland, but remember
That we are Canadian
Whatever may befall.
Who can blame us? Who can blame us
If we tell ourselves with pride
How a thousand years to tame us
The foe has often tried?
And should e'er the Empire need us,
She'll require no chains to lead us,
For we are Empire's children,
But Canadians over all.
Then line up and try us
Whoever would deny us
The freedom of our birthright,
And they'll find us like a wall,
For we are Canadian, Canadian for ever,
And Canadian over all.

SCARCITY OF MILK

The Dairy Situation Offers Encouragement to Canadian Farmers

The most outstanding feature of the dairy industry at the present moment is the general scarcity of milk for the larger towns and cities. From all quarters comes the cry for more milk. Winnipeg now obtains a large quantity daily from such a distant point as St. Paul, Minn. The demand in Vancouver is closing many of the creameries in the Fraser Valley. The same thing is occurring in the neighborhood of Montreal and Toronto. The per capita consumption is increasing as the quality of the product improves, and the nutritive value of milk becomes better known and appreciated. The prices of milk and its products have not advanced relatively with the prices for meats and other food supplies, and such a condition is bound to cause a relative increase in the consumption of dairy products. Dairy products generally are being made more popular with improved methods of production and handling. On the whole the dairy situation is such that it should encourage increased production on the part of Canadian farmers. One of the most hopeful signs for the future of the dairying industry in Canada is found in the rapid growth of the movement started by the Dominion Dairying Service a few years ago, which has for its object a study of the record of the individual cows, so that poor producers may be eliminated. The average milk yield of hundreds of herds has been increased from 20 to 30 per cent. already, where the owners have followed this "weeding" process. An increase of 20 per cent. in the average production of a 1 the cows in Canada would mean an increase of \$20,000,000. Such an increase, which would be almost wholly net profit, is not only possible but highly probable from present indications.

WESTERN FOREST WEALTH

The lumber industry and the lumber trade both showed very satisfactory returns for the year, 1911, stated Hon. Price Ellison in the British Columbia Legislature when introducing his budget. "I ventured to predict in my last budget speech that 1911 would prove a prosperous year in the lumber trade. My forecast was correct. According to the returns made to the chief timber inspector the lumber cut for 1911 was as follows. Logs officially scaled west of Coast range 619,000,000 feet; cut from Esquimalt & Nanaimo Railway lands, 144,000,000 feet; logs officially scaled east of Coast range 297,000,000 feet; total, 1,060,000,000 feet. Of this amount the total manufactured into lumber was 113,000,000 feet, and the total exported 47,000,000 feet."

WESTERN CONDITIONS

James Carruthers Predicts for 1912
the Greatest Crop on Record

Collections are improving, dealers are meeting their notes as they come in, wholesale houses report good orders, trade conditions are excellent. This is the report which Mr. James Carruthers brings back to Montreal after a three weeks' trip in Western Canada. The grain receipts inspected at Winnipeg every day, he says, show that the railways are moving forward a lot of grain. "There is no doubt," added Mr. Carruthers, "that with anything like favorable conditions next season our Canadian West will have the biggest crop of wheat on record. The farmers there are hoping for a rather late spring, with continued good weather, which they prefer to an early spring with the usual break in the conditions. "While in the West a prominent railway official predicted that in 1912 Western Canada would have a wheat crop of 350,000,000 bushels. It will then be necessary to use the Panama Canal, which will result in the export of a large amount of wheat via Vancouver."

ONE-SEVENTH EMIGRATE

Italy's Sons and Daughters Seek Fame and Fortune Away From Home

Estimates made by the Italian Bureau of Emigration show that fully 5,557,746 Italians, or about one-seventh of the entire population of Italy, are living abroad. The chief countries where they are found are the United States, 1,779,059; Brazil, 1,500,000; Argentina, 1,000,000; and Uruguay, 100,000.

There is practically no country in the world without an Italian colony. The following are the three smallest Italian colonies in the world: Acores, 17 Italians, Corea, 10, and the island of Madeira, 7.

London, Melbourne and Toronto

(Continued)

Hass'n done chattered. Sukey? a thin old woman's voice cried from the lodge. Come in to thy supper, an' glee thy teeth some toll an thy tongue a rest!

At a point in his homeward route, where the road to Bloxham crossed that to Loders Abbey, Harry was in time to see the inquisitive stranger whom he had just met with Lisette, get into a dogcart, which was in waiting with a man at the reins, and drive away.

He wondered whether the fellow was staying at Bloxham or returning to London. Evidently he had his reasons for keeping the neighborhood under observation, and from his words to Lisette he meant to return to Loders Abbey during the week. Did he intend to start a persecution of Lady Anne?

He had already declared to Harry that he knew her well, and that she would certainly receive him when he called. Yet Lady Anne had stated that she knew no one of the appearance Harry had described as that of the man with the questioning cravat-pin.

I would soon protect her from impertinent strangers if she would only give the right, he told himself. And I mean to ask for it to-morrow. After all, each time I have been to Loders it was at her invitation; she came of her own free will and had tea with me, and gave me one of her choicest roses, and her manner to me was the sweetest in the world. She was anxious about me when I was away, too. How can I help feeling encouraged? I know quite well she cannot love me yet, but if she only gets used to the idea of my loving her, that is half the battle.

He saw as he reached the gate leading to the grass plot that the lamp on the dining-room table was turned low. The window was shut and it was difficult to see through the tiny panes of old glass, but before he reached the porch he became convinced that someone—a man—was moving stealthily about the room.

He quickened his pace, and, entering the dining room suddenly, he locked the door and turned up the lamp.

Crouching down before the writing table and squinting up at him with a malevolent expression, Sammy the idiot was revealed, and Harry's wrath rose at the unlovely sight.

He caught hold of the fellow by his collar, and dragged him to his feet.

You have been wounded, he said. It would serve you jolly well right if you had been killed. I shall content myself now with throwing you out at the door. But if I ever catch you in my rooms again, or following me, or touching anything of mine, I give you notice that I shall thrash you within an inch of your life!

It is Criminal to Neglect the Skin and Hair

THINK of the suffering entailed by neglected skin troubles—mental because of disfigurement, physical because of pain. Think of the pleasure of a clear skin, soft, white hands, and good hair. These blessings, so essential to happiness and even success in life, are often only a matter of a little thoughtful care in the selection of effective remedial agents. Cuticura Soap and Cuticura Ointment do so much for poor complexions, red, rough hands, and dry, thin and falling hair, and cost so little, that it is almost criminal not to use them.

Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a postal to "Cuticura," Dept. 5M, Boston, U.S.A., will secure a liberal sample of each, with 32-page booklet on Skin and Scalp Treatment.

W. N. U. 909

He unlocked the door and threw the fellow out into the passage. Sammy made no response, but a hoarse laugh, and crept off towards the kitchen.

Not until after supper did Harry ask himself whether the man had robbed him. The only money he had left about was a handful of pennies he had placed in the desk. He opened it, and found them missing.

But with a shock of surprise and bewilderment, he discovered that the little bottle of arsenic preparation had been stolen too.

CHAPTER XXVII

A Declaration

Half-past three!

Harry stood before the lodge gates of Loders Abbey, and realised that he felt nervous.

Not only would this be the first offer of marriage he had ever made but it was the first occasion on which the idea of marriage had entered his head.

He had always meant to marry some day, but he knew himself well enough to be sure that the call to do so would be irresistible when once the real woman appeared. She had come now in the person of Lady Anne Daubeney. Whether or not she was a suitable wife did not trouble him. He only knew that from the moment when he had come upon her in the wood six days ago he had thought of nothing else, and that life had become a series of intervals to be somehow employed between the occasions for meeting her.

She must have guessed, he told himself, from the terms of his letter that he meant to ask her to marry him. At least she had not written bidding him keep away. He expected that she would refuse him at first. Very possibly she might do so often, but in the end he felt assured that his persistent devotion would win her.

She had always been difficult to please. Had not Denzil Warne informed him of her repeated refusals of his son's proposals? If Lucian Warne could go on possessing his soul in patience and renewing his offers, it would be odd if he, Harry, could not be prepared to wait for weeks, perhaps for months, before he could hope for a favorable answer. But it would come. Perhaps even by the time his claim to the estate was established, he would find the out her repugnance against marriage and against his family.

Presumably she had a repugnance against marriage; for why should she, a wealthy young woman, choose to spend her days in such conventional retirement, and even boast that she had no friends and saw no one?

Through all his nervousness a golden dream floated before Harry's eyes, a dream of the day when these old gates would open for Lady Anne to pass out, a happy bride, and when all the crime and misery of years ago would be forgotten in the rejoicings at Lyllyngton Court, when Sir Henry Clavel brought his gold-haired wife back to reign in the house of her girlhood.

His hand was upon the chain of the bell at the lodge gates when they were suddenly flung open from within, to allow the passage of a tall, slight, grey-haired man in the garb of a Catholic priest.

Harry gave him a quick look of interest. Against his wish he had to own that there were certain elements of mystery connected with Loders Abbey. But to this man they must all be clear as daylight.

Father Carey looked an ideal recipient of sacred confidences. He belonged to the Order of Jesuits, and possessed the type of face often seen among members of that branch of the church. His features, fairly regular without being handsome, were under perfect control. His light-grey eyes had a curious trick of settling themselves fixedly upon the faces of the persons with whom he conversed, and then of suddenly withdrawing their gaze, as though he did not wish any impression made upon him to be guessed by others. The pallid, blueish hue of his dark skin was more suggestive of ill-health than of asceticism, and his stooping, narrow-chested figure looked far older than his watchful eyes.

Harry Clavel, who had an honest respect for ministers of religion, raised his hat. Father Carey returned his salute, and paused to speak with him. I seem to know your face very well, he observed. Now where can I have seen it? At Seacombe? Or perhaps at the little chapel on the Bloxham road? At neither. I am not a Catholic, and I have only been here a week to-morrow. Ah! Most interesting, these ruins. Do you know them? I have been over them. And the chapel here, with the last Abbot's tomb? Do you know that? No! I had no idea that he was buried here. How did that come about? (To be Continued)

Another Danger of the Summer Season Charles D. Hilles, the President's secretary, always accompanies the chief executive on his trips to Beverly, Massachusetts, in the summer. Just outside of Beverly there are many fashionable homes, with grounds which include private bathing beaches.

I wonder why so many people have these private beaches, commented the President one afternoon, when he was touring up the North Shore.

Some of them, said Hilles, appreciate the value, no doubt, of this means of hiding the family skeletons.

CANADA'S PULPWOOD, 1911

Discussed in a Recent Bulletin of the Forestry Branch

Ever since the Province of Quebec forbade the export of pulpwood cut from Crown lands, considerable interest has been taken in the question as to how the price of pulpwood would be affected. A leading paper trade periodical estimated that the price of pulpwood had advanced one dollar per cord. This is corroborated by the bulletin on pulpwood lately compiled by the Forestry Branch of the Department of the Interior. According to this bulletin, the average price of pulpwood in Quebec province during 1911 was higher by ninety-seven cents than during 1910. In Ontario the price actually fell twenty cents per cord, while in Nova Scotia and New Brunswick increases of twenty-nine and twenty-two cents respectively are announced.

A question that is just beginning to come into notice in the Dominion is the utilization of saw-mill waste as material for pulp making. A very small quantity of such waste is so utilized by three firms, which own both saw-mills and pulp-mills.

TO STRENGTHEN WEAK NERVES

The Blood Supply Must be Made Rich, Red and Pure

When you build up the blood you strengthen the nerves, because the nerves get their food through the blood. You cannot reach the nerves with medicine except through the blood—this is a great medical truth few people realize. Nervous people are pale people. They are nervous because they are pale. The blood is so thin and watery that it cannot nourish the nerves. Starved nerves mean sciatica, neuralgia, nervous prostration, paralysis.

Dr. Williams' Pink Pills for Pale People are a real nerve tonic. They supply plenty of nourishing red blood to the exhausted nerves, thus enabling them to do the work nature intended they should do. This is the simple secret of the success of Dr. Williams' Pink Pills in curing nerve troubles. As to their value in cases of sciatica, Mrs. Job Palmer, Fenelon Falls, Ont., says: "For seven weeks I suffered untold agony from sciatica. I tried everything to ease the pain, but it steadily grew worse. Liniments had no more effect upon the trouble than water. Then the doctor told me to apply a hot iron to the afflicted part and I did so morning after morning, but my leg had become so numb with the pain that I could hardly feel the heat of the iron. I never expected to be able to walk again my leg was so drawn up. I had tried so many things that I had given up hope, yet at the urging of my brother I decided to try Dr. Williams' Pink Pills. To my surprise in two weeks I was able to stand on my feet with but little pain, and soon after I was able to walk about again. I continued taking the Pills for about two months, but some time before I discontinued their use my leg had become normal again, and the agony of the trouble had disappeared, and I have not since had a twinge of it. Words fail to express my gratitude for what the Pills did for me and I strongly recommend them to all sufferers from sciatica.

The every day mission of Dr. Williams' Pink Pills is to cure cases like the above, and they will not disappoint if given a fair trial. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

A Tale of Letters

Which letters are the hardest workers? The Bees (B's).

Which are the most extensive letters? The Seas (S's).

Which letters are the most fond of comfort? The Ease (E's).

Which letters have the most to say for themselves? The I's.

Which are the noisiest letters? The Jays (J's).

Which are the longest letters? The Elms (L's).

Which are the poorest letters? The Oves (O's).

Which letters are the greatest bores? The Tease (T's).

Which are the most sensible letters? The Wise (W's)—Tit-Bits.

Minard's Liniment Cures Colds, Etc.

A Born Candidate

Willis—I suppose you think that baby of yours will become president some day?

Gillie—Maybe not president, but he will be in the race after the nomination all right. He keeps the whole place in an uproar, uses indescribable language, and can go without sleep for a week.—Brooklyn Life.

Very many persons die annually from cholera and kindred summer complaints, who might have been saved if proper remedies had been used. If attacked do not delay in getting a bottle of Dr. J. D. Kellogg's Dysentery Cordial, the medicine that never fails to effect a cure. Those who have used it say it acts promptly, and thoroughly subdues the pain and disease.

For the Time Being

My husband cured himself by drinking buttermilk.

What did he have?

A thirst.—Chicago Record Herald.

INSURES PERFECT BAKING RESULTS

THE FAVORITE BRAND

ROYAL YEAST

"I Want You to Have My New Portable Granary"

"I have a money-saving invention—handy granaries to allow field threshing over your farm. Move them about each year. You save long hauls at harvest time. In spring you scatter small straw stacks—no burning of straw."

"These granaries come in compact bundles. A boy can set up and bolt one together in a few hours. Four padlocks protect the grain. Separator delivery into a spout on the side or into roof manhole—saves work during threshing. Your grain is protected from vermin, wet and thieves. Sell it when you are ready, loading direct from the granary into your wagon, or bagging it. No noisy or heated grain. Get my granary and be independent of elevators for selling. Sell at the highest price, no matter how long you store your grain. The Pedlar Granary protects you."

"Write me for my booklet. It shows how profitable my Granary is even on a single quarter-section farm. Use it for 1912. The Book Tells of Big Money for You."

When Your Eyes Need Care
Try Murine Eye Remedy. No Smarting—Feels Fine—Acts Quickly. Try it. Red, Watery, Itchy Eyes and Granulated Eyelids. Illustrated Book in each Package. Murine is compounded by our Oculists—not a "Patent Medicine"—but used in successful Physiological "Cures" for many years. Now distributed to the Public and sold by Druggists at 25c and 50c per Bottle. Murine Eye Remedy in Aseptic Tubes, 25c and 50c. Murine Eye Remedy Co., Chicago

Lead production in the United States last year reached one billion pounds, an increase of forty million pounds over 1910. Imports last year were 180 million pounds, a decrease of thirty-seven million pounds.

NATURE'S ESSENCE... Extracted From Forest Plants.

Nature's laws are perfect, but disease follows if these laws are not obeyed. Go straight to nature for the cure, to the forest; there are mysteries here that we can fathom for you. Take the bark of the wild-cherry tree, the root of mandrake, stone, Oregon grape root, queen's root, bloodroot and golden seal, make a scientific, non-alcoholic extract of them with just the right proportions and you have

Doctor Pierce's Golden Medical Discovery.

It took Dr. Pierce, with the assistance of two learned chemists, eight years of hard work experimenting to make this pure glyceric extract and alternative of the greatest efficiency and without the use of a particle of alcohol.

Just the sort of remedy you need to make rich, red blood, and cure that insidious and feeling of nerve exhaustion. Dr. Pierce's Golden Medical Discovery bears the stamp of PUBLIC APPROVAL and has sold more largely in the past forty years than any other blood purifier and stomach tonic.

"Some time ago I got out of health—my stomach seemed to be the seat of the trouble," writes Mr. Ezra Williams, of Belleville, Kan. "I commenced to doctor with all the doctors at home as well as with other specialists on stomach and digestive organs. None seemed to do any good—in fact, most of the medicines did me harm. Finally I wrote to Dr. Pierce, Buffalo, N. Y., who replied, stating that I had liver complaint with indigestion and constipation, and advised Dr. Pierce's Golden Medical Discovery and Pleasant Pellets."

"The Discovery and Pellets have put me on my feet again"—comes to be just what I needed. I could not have recovered without them."

E. WILLIAMS, ENG. **Dr. Pierce's Pleasant Pellets are for liver ills.**

WHAT BRITAIN IS DOING TO MAINTAIN NAVAL SUPREMACY

Is Building Two or More Ships for Germany's One in all
Lines of Naval Construction, the Estimate for
1912 Being \$225,000,000

London.—In the debate on the naval estimates in the House of Commons Winston Spencer Churchill, first lord of the admiralty, replying to the criticism that he had made inadequate provisions to meet the menace he had described, said:

We are spending 45,000,000 pounds (\$225,000,000) this year and are going to spend more next year.

We are raising the personnel of the navy to 141,150 by 1913 and to 146,000 in 1914.

As regards construction Germany this year is laying down two new battleships and we four.

Germany is laying down one extra and we two. This year Germany is laying two small cruisers; we are laying down eight.

Germany in the course of the next eighteen months is laying down 21 destroyers, we 43.

There is no cause for panic or alarm.

The Manchester Guardian in an editorial disparages what it describes as the vicious note of alarm sounded in Churchill's speech and urges a constructive policy of friendship with France.

As the Guardian is among the foremost Liberal newspapers the article attracts wide attention. It goes on: "The hope that the colonies will extract us from our difficulties seems

wildly out of proportion to the actual facts. The colonies for a long time to come will do well if they can make themselves responsible for their own naval defence, over which under Premier Borden, Canada has gone further than any of the others. This does not expect actually to lighten our burdens.

Moreover, their aid is conditional on a serious change in the Empire's constitution which is full of difficulty. The matter cannot be settled by sentimental impulse. Parliamentary federation is quite out of the question for the present and colonial representation could only come by the admission of the colonies to a share of executive control. This result would mean increased independence of the executive which would aggravate the existing evil of loss of control of foreign affairs by parliament.

Sydney, N.S.W.—The Morning Herald, commenting on Winston Churchill's speech says:—

Since Germany will not yield to Britain's persuasions in the matter of curtailing armaments nothing remains but to continue building with the risk that the nation may some day elect to fight things to the bitter end.

Our duty is to provide for that day and strengthen the Empire for the crisis.

GERMANS BLAME GREAT BRITAIN

Disclaim Responsibility in the Respective Navies

Berlin.—German public opinion is neither disturbed nor irritated over the recent naval debate in the house of commons in London. The press generally seems satisfied with Germany's comparative positions under the new order of things, and praises the speech of Winston Spencer Churchill, first lord of the admiralty, as frank without the usual provocation.

It criticizes, however, the attempt to throw the responsibility for increased armaments on Germany.

The Vossische Zeitung, in commenting on the subjects, points out that the increase in the German fleet was due to the tone of the British statesmen during the Morocco crisis which compelled every German to regard an increase in the German fleet as a commandment of self preservation. The Vossische Zeitung takes up Arthur J. Balfour's phrase in which he referred to senseless competition in shipbuilding, and asks:

Who is responsible? It was not Germany that invented dreadnoughts, super-dreadnoughts and submarines.

A responsible official corroborated the standpoint of the press, and asserted unequivocally that the speech delivered by David Lloyd-George, chancellor of the exchequer, at the Mansion House, London, in 1911, was the direct and sole cause of the German naval bill.

GEORGE SERLES NEW INSPECTOR

Succeeds Commissioner F. E. Gibbs as Chief Grain Inspector

Winnipeg.—By a recent order-in-council upon the recommendation of the grain growers, George Serles, of Winnipeg, has been appointed acting inspector of the western division—all Canada lying west of and including Fort William and Port Arthur.

This is the territory in which Mr. F. E. Gibbs was chief inspector but upon Mr. Gibbs' promotion to be one of the Commissioners under the Canada Grain Act of 1912 and his resignation of the inspectorship, a new inspector was required and the position has been given to Mr. Serles.

The new appointee had been for many years identified with the grain trade.

RUSH FROM OLD COUNTRY

Steamship Agents Advised to Stop Booking Passengers to Canada

Montreal.—The Herald says: Stop booking passengers west bound from England until further notice. This is a cable just received by the agents of the Canadian Northern steamship agents. The rush homeward of Canadians and Americans has begun and will be on in earnest next month. All vessels of the leading lines due to sail for the next few weeks from British ports for Montreal and New York are booked up to the limit. Many passengers who did not buy return tickets when they left here now find they cannot buy first or second class accommodation. Some well-to-do passengers, it is said, have bought third class tickets.

Ploughed into Roman Forum

Rome.—Jumping the track, owing to running at too high a speed, a street car plunged into the Roman Forum and mounted the ruins of the Rostrum, where Mark Antony delivered Caesar's funeral oration. The ruins were still further ruined and eighteen passengers were sent to the hospital.

FRENCH FOR WEST

Exodus from Quebec Province Growing Stronger Every Year, Say Railway Men

Montreal.—A large number of people are leaving for the West on the excursion for homeseekers.

It is noticed that the percentage of French-Canadians is stronger than usual. It was stated by officials at the Windsor station that the exodus of French-Canadians for the Western provinces is growing stronger every year.

There were fully 150 men in a party gathered from Montreal and Quebec and from intermediate districts.

Most of them were bound for places in Saskatchewan and Alberta, and their tickets were good for four months, giving them ample time to work in the West during the harvest season and have a look around to see if they could find places where they would like to settle.

Most of the men were accompanied by their wives and children and said that they were going to pick out land on which to establish homes in the new country.

About half of the party was composed of French-Canadians from this province, most of whom had wives and good-sized families with them, as well as good supplies of money to tide them over until they had chosen their future homes.

That the immigrant season is now in full swing was shown at the Windsor station when the big platforms were crowded with people, most of whom spoke with a strong Scottish accent. There were 200 immigrants from the Cassandra, about 100 from the Granada and 150 from the Pretoria. The whole party was collected into one and sent on a second section of the Imperial Limited. The majority of the immigrants were Scottish and most of them bound for Alberta or Saskatchewan. They were of a good class and well supplied with money.

MANY LABOR DISPUTES

Seven Arbitration Boards Have Been Applied for to Labor Department

Ottawa.—There are an unusual number of labor disputes for this time of the year reported by the labor department. At present no less than seven arbitration boards are either working or have been applied for. The most important dispute is that involving the C.P.R. telegraphers. The department has appointed a board to endeavor to settle the trouble which involves questions of both wages and conditions of labor. Telegraphers all along the C.P.R. system are affected. Peter Macdonald, of Toronto, is chairman. J. E. Duval has been appointed the representative of the company, and J. G. O'Donoghue the men. The department has also named two men in connection with a dispute at Halifax between the Halifax Tramway Company and its employees. G. S. Campbell will represent the company and John T. Joy the men.

Application has been made for a board at South Porcupine, where there is a dispute at the Macenney Mine. Only forty men are involved in this particular dispute, but there are nearly a thousand men employed in the district, all of whom will be affected by the decision. An arbitration board is working at the present time on a dispute at Inverness between the members of the Inverness Coal and Ore Dock Co. and its employees. Application has also been made for a board by the employees of the Britannia coal mine near Vancouver. There is also trouble between the Gas Consumers Company of Toronto and its men, which is hoped will be settled without reference to a board.

Half Million Americans Each Year

Calgary, Alta.—An influx of not less than half a million Americans per annum into Canada for the next five years is the prediction being freely circulated by well informed authorities in this part of the West. In view of recently announced railway construction programmes and development plans of the leading Western cities. The problem of housing the new population continues a serious one in view of the influx. The cement shortage, however, is not proving a serious obstacle to building operations, and many new residences and store buildings are in course of construction. Recent oil, gas and clay developments in this section have begun to emphasize Calgary's future as a manufacturing and industrial centre; although the possibilities for lucrative profits in real estate are not being overlooked. Sixteen millionaires are now numbered among Calgary's citizens, and the majority of the sixteen are said to have extensive land holdings, which are steadily increasing in value.

Complete G.T.P. by 1914

Vancouver.—Collingwood Schrieber, of Ottawa, general consulting engineer of the Dominion government, and chief government engineer of the Grand Trunk Pacific Railway, reached here recently. The latter has just completed an inspection of the line as far as a point on the south fork of the Fraser river forty miles west of Railroad, at Tete Jaune Cache, which is 56 miles beyond the summit of Yellowhead Pass. I have every confidence, said Mr. Schrieber, that the main line of the G.T.P. to Prince Rupert will be finished and in operation by the end of 1914. I think it will be ready before that period but it will take some time to get the road-bed in shape for traffic.

Regina Harvesters

Winnipeg.—The supply of harvesters for western Canada's 1912 crop will be the subject of a conference to be held in Winnipeg between the representatives of the C.P.R., C.N.R. and G.T.P. Railways, and the delegations of the agriculture departments of Manitoba, Saskatchewan and Alberta. The provincial representatives will submit conservative estimates of the harvest hands required for their respective provinces. A F. Mantle, deputy minister of agriculture for Saskatchewan, was in Winnipeg Monday conferring with the railways regarding harvest laborers for this province, and will probably return for the conference next week.

To Settle Labor Disputes

London.—The Chancellor of the Exchequer, David Lloyd George, announced in the House of Commons the intention of the Government to introduce a Bill to deal with labor disputes, such as the present dock strike. The Chancellor did not define the measure, but indicated that it was likely to involve compulsory arbitration and financial guarantees for agreements.

Shipped Poor Apples

Ottawa.—Many complaints have been received by the trade and commerce in regard to the shipments of apples from Canada. Several shipments have arrived covered with mould or in a sticky condition, and though labelled as fancy evaporated apples, contained seeds and cores below the first layer. The department is considering taking action.

Germany Buys Dirigible

Berlin.—Following a test in which it developed a speed of 49 miles hourly, the Government has bought the most up-to-date Zeppelin ever built, named it Z.3, and ordered it sent to Metz fortress, on the French frontier.

PICTURES ACROSS ATLANTIC

Invention Claims a Faster and a Vastly Improved System

London.—Wireless messages will be sent across the Atlantic and to other parts of the world by a new system, according to experts within four months, not only much faster than by the present system but also with such precision that it will be possible to send pictures by this means.

The new system has been taken up by one of the big European telegraph companies and will be given a thorough test by a syndicate organized under the auspices of the telegraph company, so far as the transmission of wireless messages is concerned.

Stations are to be erected at Lyons in France and at Washington and the inventor claims that he will be able to send at the rate of 200 words a minute.

The improvement consists in being able to control a continuous wave as compared with the intermittent waves in the present system.

After the Franco-American line is working the company intends to extend the system to the east, to Africa and to the British colonies. The British government has investigated it, but it is apparently satisfied as it has been in all recent inventions, to let some other nation test it before adopting it in the British Isles.

TO PATROL HUDSON BAY

Customs Officials Purchase Schooner To Trace Smugglers There

Halifax, N.S.—John McDougall, C.M.G., commissioner of customs, is in Halifax making arrangements in regard to the custom department.

Mr. McDougall has arranged to purchase the schooner Arthur W. for customs preventative work in Hudson Bay.

The vessel is to be provided with oil engines and to be commanded by Captain John F. Chapman, who will act as preventative officer for the Hudson Bay district.

He will leave in August, and will make his headquarters at Port Burwell, at the entrance to the Bay, and will have general supervision over customs matter in that inland sea.

Simply Precautionary Measure

Ottawa.—Some New York newspapers have taken the proclamation in the Canada Gazette of Saturday closing the ports of Quebec, Halifax and Esquimaux to foreign steamers under regulation, as indicating an intention on the part of the Canadian government to close these ports to all steamers of any nation whatever. But it is explained at the naval department that the order is purely a precautionary one, and that it is advisable for shipmasters to paste it in their books and keep it in their memory. There is not present reason for trouble but it is considered just as well to advise shipmasters all over the world that when the hour of danger comes (if come it does) they must be prepared to obey the regulations of the Canadian naval department.

Wheat Cutting in Alberta

Lethbridge.—Wheat cutting in southern Alberta has commenced. Superintendent Fairfield of the experimental farm has turned binders into several plots of winter wheat which are ripe and in fine condition for cutting.

H. A. Suggitt, a farmer at Chin, has begun cutting a six hundred acre field north of Chin. Cutting will be general over the south within the next ten days.

INTEREST IN SHEEP INDUSTRY

Hon. Martin Burrell, Minister of Agriculture, is Taking Active Steps

Ottawa.—Hon. Martin Burrell is leaving no stone unturned in his efforts to stimulate the Canadian sheep industry which has in recent years been on the wane. R. H. Harding, of Thornhill, Ont., one of the best known authorities in the Dominion on sheep breeding, and a member of the Sheep Breeders' Association, has consented to act for the department of agriculture in purchasing thoroughbred stock. The thoroughbreds, numbering three or four hundred, will be chosen from the best Ontario flocks. Acting Live Stock Commissioner H. S. Arkell has returned from a tour of the maritime provinces. He has been studying the sheep industry there, and finds an awakened interest among the farmers. A special commissioner is studying at the present time the sheep industry in western Canada.

Poor Baking Powder

Ottawa.—That of a number of different samples of baking powder examined, almost twenty-five per cent. were below standard strength, is the conclusion to be drawn from an interesting bulletin on baking powders in Canada, issued by the department analyst. A total of 150 samples of powders were examined, this being the fourth time this has been done, and the examination being conducted with a view to discovering the powders' efficiency as a gas producer for baking purposes and the wholesomeness of the material from which it was made. Some of the powders were found to contain alum, concerning the wholesomeness of which a board of scientists is now adjudicating in Washington. From the point of view of effectiveness, it was found, as stated, that 45 out of 150 samples, almost 25 per cent were below standard.

Goes to Maritime Province

Ottawa.—Hon. Martin Burrell, minister of agriculture, leaves next month on an official visit to the maritime provinces. While there he will visit the experimental stations and will confer with leading eastern agriculturists in regard to existing conditions on the farms. C. C. James, who was entrusted with the task of working out a basis for the proposed federal aid to the provinces in the interests of agriculture, is expected back in Ottawa early in August, when he will report progress on his investigations to date.

"ECONOMY" SLOGAN OF SENATE

Washington.—Democrats of the House in caucus voted 70 to 62, not to recede from their "no battleship" programme in the naval appropriation bill.

A determined effort was made to have the caucus approve a compromise with the Senate whereby the House would agree to the construction of one sea-fighter.

Representative Fitzgerald, chairman of the appropriation committee, led the opposition to the proposal on the ground of economy.

Tendering Government Jobs

Ottawa.—Government jobs aggregating four million dollars will be put up at tender this week. These are two big harbor works, one at Quebec and the other at Victoria, each costing two million dollars. The Quebec improvement consists of construction of another large pier for ocean liners, along with sheds and considerable dredging and filling.

THE SUNDAY SCHOOL

LESSON V.—THIRD QUARTER, FOR
AUGUST 4, 1912

Text of the Lesson, Matt. xiii, 44-53.
Memory Verses, 45, 46—Golden Text,
Matt. vi, 33—Commentary Prepared
by Rev. D. M. Stearns.

It was after he had sent the multitudes away and went into the house that He explained to the disciples the parables and spake these other of today's lesson. It has been said that a parable is like a nut that has to be broken to get the meat—it keeps the meat from the indolent and for the diligent. It is also true that there are outside truths for the world that they may receive if they will and enter in, and there are truths only for those who are within. The parables of the hidden treasure and the pearl give us wholly another view of what is going on in this present age and of its consummation in spite of all the work of the adversary. Remembering what we said in a previous lesson concerning the explanation of a word or phrase holding good through the whole discourse, we now note the field of verse 44 and the explanation in verse 46, "The field is the world." The word "treasure" takes us back to Ex. xix, 5. Israel His peculiar treasure. See also Ps. cxxxv, 4; Mal. iii, 17, margin. Thus the law, the prophets and the Psalms enlighten us concerning the treasure. Since Israel's rejection of Christ and her consequent scattering among all nations she has been a treasure to no one but Himself, but to Him she is as the apple of His eye, and till sun, moon and stars cease to shine she shall not cease to be a nation before Him (Zech. ii, 8; Jer. xxxi, 35-37). Who can this be who gives up all that He has in order to buy the field? No one can buy the field but He who has the right to redeem it, the true Boaz, the mighty man of wealth, who as evidence that He had purchased or redeemed the field wore the crown of thorns.

The story of the pearl is virtually the same except that the pearl is the church, as the treasure is Israel. Pearls come from the sea, and in Rev. xvii, 15, it is written, "The waters which thou sawest are peoples and multitudes and nations and tongues." In Eph. v, 27, the completed church is spoken of as a glorious church, not having spot or wrinkle or any such thing, but holy and without blemish. In these words one cannot help seeing a perfect pearl without spot or blemish or wrinkle. In this case, as in that of the treasure, the man gave up all that he had to purchase it. Salvation, or eternal life, or the Son of God, in whom we have redemption is not obtained in that way, but as the free gift of God (Rom. iii, 24; v, 1). Neither money nor good works can obtain eternal life. The cost of our redemption fell wholly upon Jesus Christ, and by His perfect life and death in our stead and resurrection from the dead He has provided eternal redemption for all who will receive Him. We are saved, however at so great a price in order to become His disciples, and the cost of being a disciple falls wholly upon the believer as it is written, "Whosoever he be of you that forsaketh not all that he hath he cannot be my disciple" (Luke xiv, 33). Returning to the treasure and the pearl which He obtains by giving up all that He had, "for ye know the grace of our Lord Jesus Christ, that though He was rich, yet for your sakes He became poor that ye through His poverty might be rich" (II Cor. viii, 9), it is certainly true that whatever of value or preciousness there will be in Israel or the church it will be because of union with Him in whom alone is any preciousness. Another phrase of truth should be considered in connection with Israel and the church, and that is that Abraham was promised a seed as the stars of heaven and as the dust of the earth or the sand of the sea, a heavenly and an earthly seed. Here also we see that church, the heavenly and Israel, the earthly seed. When these have been fully gathered we shall have the kingdom ruled over by a righteous king and with Him the earthly people, all righteous.

The seventh parable, the net gathering of every kind, may refer to this whole age or specially to the end of the age, but the great truth seems to be the separation of good and bad. The Lord Jesus did not believe in all who said that they believed on Him (John ii, 23-25), and we cannot tell always who are true and who are not, but the day will declare it. It is ours to gather all we can. How fearful are the words about the severing, the furnace of fire, the wailing and gnashing of teeth (verses 42, 49, 50; xxii, 13; xxiv, 51; xxv, 30, 41), and if the language is figurative what must the reality be? It is most plainly taught in Scripture that for the righteous there is an eternity of bliss and for the wicked who reject Christ and die in their sins an eternity of woe. How important this question, "Have ye understood all these things?" (51). They were very ready with their "Yea, Lord," but it was not long before He had to say: "Are ye also yet without understanding? Do not ye yet understand?" (xv, 16, 17). It is through faith we understand (Heb. xi, 3), and the one thing required of us and that we can do is to have faith in God. Some consider verse 52 as an eighth parable. If we are wells of living water we will ever give forth for the benefit of others the words of life, the old truths unfolded in the New Testament and the New Testament truths opening up the old.

Have you heard of Port Alberni,

Canada's greatest ocean port on the west coast of Vancouver Island? Only distant 4 hours travel from Vancouver. Millions of dollars being spent by the C. N. R. and the C. P. R. on improvements. We own and offer for sale 120 acres of land, close in, eminently suitable for subdivision. Will sell in tracts of five acres up, on terms extending over three years, or would consider trading for first class farm lands. Send for maps and booklet on Vancouver Island and give particulars of your property, if you wish to make a trade, to the owner,

R. WALTER URE,
7 Crown Building, 1st St. East, Calgary

KEEP OUT!

"KEEP OUT" used to hang as a sign on every factory door. The old idea of secrecy in business made it a crime to show outsiders processes, materials, and methods of manufacture.

Now the white light of publicity is being let in by those who depend on public favor for business profits and business growth. The "keep out" sign is disappearing from factory doors and the "welcome" sign is taking its place.

Candor and honesty form the backbone of modern advertising. Men tell the truth, and it pays. Modern selling relies more and more on the confidence and good will of the buyer.

Today, eyes are too sharp and intelligence too keen to make deceit possible. Absolute frankness in advertising is the straight road to confidence. The public demands the light; it abominates and fears darkness.

Today, many canning factories, packing houses, bake shops, and

The public may overlook, but does not forgive, a lie or an abuse of its confidence. The public regards with suspicion those who attempt to serve it in secrecy and silence. The public is repelled by juggled facts or befogging words. The public rewards with its favor and money those who tell it the truth. It walks and shops where the light shines and where the paths are straight.

Throw on the light!

Advice regarding your advertising problems is available through any recognized Canadian advertising agency, or the Secretary of the Canadian Press Association, Room 503 Lumsden Bldg., Toronto. Enquiry involves no obligation on your part—so write if interested.

The Didsbury Pioneer

FARMING AND THE FACTORY

(For the Permanent Development of Western Canada They Must go Hand in Hand)

"What would you think of a man who tried to make one leg walk faster than the other?"

"He would go round in a circle and make no progress."

This is the homely question and answer that Mr. T. A. Russell, of Toronto, asked the Winnipeg Industrial Bureau in the course of an address introduced by the statement that the doctrine of the Canadian Home Market Association was the all-round development of Canada. The development must go hand in hand and side by side with agriculture. The prosperity of the one had an ultimate bearing on the prosperity of the other. Our motto is that of Bacon, who said, "There are three things which make a nation great and prosperous, a fertile soil, busy workshops and easy communication for man and goods from place to place."

Factory Development
Turning to the development of manufacturing in Canada, he stated in 1901 the number of factory employees was 113,334 and the total wages bill \$89,000,000. In 1906, these figures had grown to 356,000, and \$134,000,000, or an increase of 15 per cent. in the number of employees, but an increase of 50 per cent. in the pay roll. His estimate for 1911 was 450,000 employees and \$235,000,000 wages. Assuming that one worker supported three more, 2,000,000 were supported by industries. Statistics show that each person consumed on an average \$6.00 worth of wheat and \$10.00 worth of dairy products. Therefore manufacturing in Canada provided a home market for \$6,000,000 worth of wheat and \$20,000,000 of dairy products.

Three Factors
The three factors in a manufacturing industry were the stockholders, the manager and the operatives. In the company with which he was connected there were 700 stockholders, no one of whom held five per cent. of the total capital. The result was that a great many people were dependent on and interested in the industry. Thus the democracy of capital was shown in the growth of factories, but a decrease in the individual investment. There was no hard and fast line between employer and employee. There was great opportunity for men in subordinate positions to rise up to any position. The condition of operatives had immeasurably improved in recent years. Formerly the home was in reality a hut, and unwholesome at that, with long hours for the employee and much dissipation and abuse. Now, the men as a rule worked in large clean, well lighted, well ventilated rooms, amid healthful surroundings with hours regulated and habits more regular.

Room to Advance
The modern factory had abolished the sweatshop, reduced hours of labor, protected against accident, improved sanitary and hygienic standards of living, and been a factor in uplifting men. Their earnings had been greater as everywhere testified by the savings bank deposits. There was room for very workman to advance. As a result of special labor wonderful progress had been made. Factories had improved. Men worked under better conditions and higher wages; food products had increased in cost as had most classes of raw material, but the cost of most factory products was lower, quality far greater, than before. This had been done by organization, by a smaller profit per article, but a greater production of articles.

AN EGG CIRCLE

Trade in Dressed Poultry is Also Being Encouraged

As another step towards encouraging mixed farming, the C.P.R. will shortly introduce a large egg circle among the farmers in the irrigation block, east of Calgary. It is thought that this enterprise will also have the effect of obtaining the best eggs for the farmers and also securing a plentiful supply of first-class quality. The C.P.R. supply farm at Strathmore will be the centre of the circle, which guarantees to take all strictly new laid eggs produced on the farms. The innovation will be a co-operative one, and after the company's dining cars and hotels have been supplied the surplus will be sold to the dealers. Each will be paid for the eggs at six to seven cents above the market price, while the circle will also include trade in dressed poultry.

Westcott

Mr. and Mrs. J. Jas. Meredith, their daughter and niece from Elburn, Ill., are visiting at Westcott for a few weeks.

Mrs. Amos Wilson is spending a few weeks visiting friends in Calgary.

Mrs. Henry Hoffman, who has been visiting her sister, Mrs. J. H. Brawn, has left for her new home at Samson-ton.

Mr. Wm. Marshall from Calgary and Miss Marshall from Hanover, Ont., were visitors at William Wilson's this week.

The population of Westcott has been greatly increased since the government telephone men have located here. They have had several brushes since their arrival with the Westcott baseball boys but so far have not succeeded in winning a game.

Mrs. Dolman and Misses Ethel and Flo Dolman were at Calgary recently in connection with the furnishing of their new residence which has now been completed.

Mr. and Mrs. Henry Tuggle have been greatly surprised by the unexpected arrival of Mr. Tuggle's sister and her husband from the States.

Vera, the youngest daughter of Mr. and Mrs. S. R. Singer, has been stricken with a serious illness. Singers surely have their share of trouble, and they have the sympathy of the community who hope to hear of a rapid recovery.

Wm. Wilson, Henry Braun and Amos Wilson are having the government phone put in in order to be able to get the use of the long distance service.

A few of the boys are looking rather weary since the departure of the Vipond sisters for Edmonton.

Alex Ross had a very successful stock sale last week and he says unless his health improves he will have another in the near future to sell the balance of his stock and implements.

Two new Rumely threshing outfits are being added to the Westcott district this year.

Mr. Eben. Hunsperger's barn makes a great show for Westcott.

Mr. Dan Habermehl thinks the road too heavy for his buggy so he goes out horseback riding alone. Too bad, Dan.

Some of our good neighbors went to Banff and now have a cold. It is fierce.

Mr. Norman Tuggle is thinking of going to his homestead when he gets through breaking for Mr. S. R. Singer. We wish him good luck.

Mr. Hulmquist, our potato man, says the frost got his potatoes.

Some one went to Mr. J. Berts' and tumbled everything up side down. Oh my! Oh my!

While at Banff the scrible went to see all that was to be seen for the good of the mind, and one thing which he saw, the Elbow falls, was great. While standing on the cliff overlooking the wonderful work of God, he thought if he were a minister, what a sermon there was in what he saw while gazing down upon the water. There was a large tree lying there, caught by something that could not be seen, and it seemed to be tearing and pulling for its life the same as some poor human being trying to get away from his or her sin, which is hid to mankind, and those waves and whirlpools seemed to drive it back and keep it fast as a man rooted to drink or the filthy weed.

The high-born dame was breaking in a new footman—stupid but honest.

In her brougham, about to make a round of visits, she found she had forgotten her bits of pasteboard. So she sent the lout back with orders to bring some of her cards that were on the mantelpiece in her boudoir, and put them in his pocket.

Here and there she dropped one and sometimes a couple, until at last she told James to leave three.

"Can't do it, mum."

"How's that?"

"I've only got two left—the ace of spades and the seven of clubs."

Chamberlain's Cough Remedy
Cures Colds, Croup and Whooping Cough.

Gore News

(Received too late for last week's issue.)

Mrs. Watt is improving after three weeks of sickness.

Mrs. M. Geiger spent a few days at Mrs. Fulkert's and Mrs. Loveland's before leaving for Oregon to see her daughter.

Mr. and Mrs. Ray Anderson are the proud parents of a son at their house.

Alvin Frank Loveland and Frank Wright returned from out west last week. They report a good time.

Mr. and Mrs. Jim Price from Didsbury visited Mr. Loveland's Sunday last.

Mrs. Prosser and children visited Mrs. Morson a few days last week.

Pearl Reist is working at Mr. Shantz.

Westerdale

Mr. R. Simons of Westerdale is on a visit with his friend, Rev. J. B. McCubbin of the Bancroft Mission and will preach at the appointments there on Sunday the 4th.

Mr. C. F. Johnson of Eagle Hill will preach at the Westerdale church on Sunday, August 4, service to commence at 2 o'clock.

Mr. J. H. Wiper of Hartman will conduct the evening service at the Ardmore school on the same date, meeting to begin at 8 o'clock. Everyone is heartily invited to these services.

Buy it now. Chamberlain's Colic, Cholera and Diarrhoea Remedy is almost certain to be needed before the summer is over. Buy it now and be prepared for such an emergency. For sale by all dealers.

Passing along Princes street, Edinburgh, one day a herculean Scots Grey stopped at the postoffice and called on a street arab to polish his boots. The feet of the dragoon were in proportion to his height and, locking at the tremendous boots before him, the arab knelt down on the pavement and shouted out to his chum across the road, "Jamie, come over an' gie's a hand, I've got an army contract."

A Tense Matter
 Millie—Was that your intended with whom I saw you yesterday?
 Grace—Yes, my present "future" so to speak.—Satire.

"INTERNATIONAL FLY WAY"
 Prevents the Tremendous Loss from Flies

Flies cost the Farmers of Canada millions of dollars annually by robbing the growth or retarding of animals and by greatly reducing the production of milk by constantly annoying the animals all summer. Every farmer or stock raiser knows this statement to be true from his own experience.

Flies also cause a great loss of life by spreading disease from farm to farm. "International Fly Way" will keep flies off your animals and give them perfect rest from these pestiferous insects, which will make you more money in a larger production of milk or much quicker growth of all animals.

SAVE YOUR STOCK

By Using

"INTERNATIONAL FLY WAY"
 It is positively guaranteed to be effective in driving away Flies, Mosquitoes, and other insects which worry stock and reduce their earning capacity. It is harmless to the hair and skin and will be found perfectly satisfactory when used according to directions.

We place our twenty years of reputation back of "International Fly Way," and ask you to test it on our positive guarantee.

For Sale at ALL DEALERS.

Answered

Did that young man kiss you last night?

Mother, do you suppose that he came all the way up here just to hear me sing?—Cornell Widow.

Then and Now

The young wife has given her husband a dance. You're improved wonderfully, Jack, she said, as they sat down. Don't you remember how you used to tear my dress?

Yes, he replied. I wasn't buying them then.—Boston Transcript.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO. Toledo, O.

Sold by all Druggists. 75c.

Take Hall's Family Pills for constipation.

Two Heads

Who's head man in this office?

That depends.

Well, who decides things?

The senior partner rules on business matters, but the office boy decides all baseball disputes.—Washington Herald.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Cure is available.

The Better Part

Willie—Paw, what is the age of discretion?

Paw—The period when a man can't have a good time without suffering for it the next morning.—Cincinnati Enquirer.

Direct Testimony

Judge Aukam, presiding in the police court of the city of Washington, not long ago had as witness before him a man who stammered, the affliction being a sort of intermittent affair. The witness would stutter frightfully through two or three sentences, and then would sail through two or three more without hesitation. This interested the Judge greatly, and finally he asked the witness:

My good man, when do you stutter most?

Well, Your Honor, replied the afflicted man, I do it most when I'm t-t-talking.

Minard's Liniment Cures Distemper

Diogenes was searching for an honest man.

Find a suburbanite who will tell you his real opinion of country life in winter, we advised.

Herewith he departed to apply the greatest test of all.—Harper's Bazaar.

The above photo shows the new factory of the Mooney Co. at Vancouver, the latest link of the across the continent chain of factories of the Mooney Biscuit & Candy Co., Head Office, Stratford, branch factories at Winnipeg and Vancouver. The latest factory has been purchased from the H. Smith Biscuit Co., of Vancouver, the pioneer biscuit and candy manufacturers of the Pacific Coast. This company enjoys a very substantial business, and only last year erected a new factory building of steel and cement construction which is one of the most modern in the Dominion. While the Mooney Co. have not divulged the exact amount of the purchase price, it is understood to be in the neighborhood of \$300,000.

The story of the organization and progress of the Mooney Biscuit Co. reads almost like a tale from the Arabian Nights. Less than eight years ago the business was started in a small way in Stratford, Ont. Mr. W. J. Mooney the founder, who has been and is still the President of the Company, has been called "the wizard of the biscuit business." He has had for many years some very original ideas regarding the biscuit business, and immediately on the organization of his own factory he proceeded to put them into operation. One of these was, that factory-made biscuits, if fresh, could in a large measure supplant the home-made article. Consequently, steps were taken to place the biscuits on the grocers' shelves in a condition of freshness heretofore unheard of in the biscuit business of Canada. Goods were shipped the same day they left the oven, and arrangements were made for specially fast despatch. The company's own line of private cars was installed to insure cleanliness, and to avoid delays and a strenuous advertising campaign was launched to promote a rapid movement of the goods after they actually reached the retail merchant. The effect of this policy was little short of wonderful. The business developed at a rate undreamt of by its founders and each succeeding year necessitated extensions in factory, until finally a brand new building was erected to take care of the rapidly increasing business.

In the Canadian West the results were of a particularly gratifying character, notwithstanding the long distance from the seat of manufacture. In fact, so satisfactory were the results that the Mooney Company decided that the proportions of the Western trade entitled it to be served by a Western factory, so that the people of the West, as well as those of the East, might receive Mooney's goods in an absolutely as "fresh from the oven" condition. Consequently a little less than two years ago the big factory in Winnipeg was secured, and the results which have been achieved since that time have fully justified the wisdom of the venture, and have set the seal of approval on the branch factory idea. The business of the Mooney Biscuit & Candy Co. is now conceded to be the largest of the kind in the Dominion of Canada, and it ranks very prominently among the big industrial enterprises of the country.

Although the British Columbia territory has heretofore been served by the Mooney factory at Stratford, nevertheless the business has fully kept pace with the growth of the territory, and has now reached proportions where the company feel that it can only be taken care of by a factory actually on the ground. In addition to the present business of the Mooney Co. the new factory will also take over the existing business of the Smith Co., which is of very considerable proportions, so that it is expected that the new factory will at once be taxed to its utmost proportions.

Mr. W. C. Mooney the Vice President of the Company, who has been manager of the Winnipeg factory, is now in Vancouver and will have charge of the reorganization work.

New modern plant of E. W. Gillett Company Limited, Toronto, Ont., consisting of six buildings, with three Railway sidings and separate office building.

M., the eminent eye specialist, for by giving absolute satisfaction to such cases as yours that he has made his reputation. A word to the wise is sufficient. Will again be at the Golden West Hotel, Didsbury, on Tuesday, August 20.

The Modern John Wesley

Didsbury church circles have been especially favored during recent days by the visit and services of the modern "John Wesley" in the person of Rev. P. F. Bresse, D. D., founder and general superintendent of the Nazarene church, Los Angeles, Cal.

Dr. Bresse ranges among the spiritual giants of modern times. He is a princely preacher and camp meeting hero of long experience who is widely known on the American continent and whose veteran life has been crowned with years of successful soul winning. The two sermons preached in the Mennonite church by this aged saint of God were rich and full of strong spiritual food exceeding helpful to any desirous of such help.

The large attendance was full proof of the general estimation of this rare privilege. Sec Holiness League.

Sanger's Big Circus Coming to Didsbury

Sanger's Greater European Shows will exhibit in Didsbury on Wednesday, August 14th, afternoon and night. This is one of the best and most up-to-date shows on the road and travels in its own special train of cars. The agent was in Didsbury today and made all the necessary arrangements for the coming of these great shows on Wednesday, August 14.

RED TROUSERS DOOMED

Less Conspicuous Color to be Used in The Austrian Army

The red trousers typical of the Austrian and French soldiers are doomed so far as the Austrian army is concerned, and a dingier and less conspicuous color is to be substituted.

The origin of the red trousers in Austria is quite on a par with their origin in France. It was Napoleon I. who introduced them, and his idea was to encourage the cultivation of the madder root, which at the time was the chief source of a red dye.

Accordingly vast fields were turned into farms for the growth of the root, and wealth was accumulated by their owners and the manufacturers of the dye. In fact till very recently the madder root industry was flourishing in France.

Then came the discovery of aniline dyes, the manufacture of which soon assumed vast proportions in Germany. The madder root industry went under after a short struggle, and the French had then to turn to Germany for the dye for their military trousers.

Now the German conqueror is supplying most of the red in the French soldier's uniform. Perhaps the French will follow the example of the Austrians and abolish red trousers.

Admirals Promoted

Vice-Admiral Sir George F. King-Hall has been promoted to the rank of admiral, and Rear-Admiral P. W. Bush has been made a vice-admiral. Captain A. P. Stoddart becomes a rear-admiral.

Rear-Admirals (retired) W. Stokes Rees, H. C. Reynolds, and F. C. Niel all become vice-admirals on the retired list.

Municipal Trading

Coventry City Council voted \$45,000 to the relief of local rates out of the profits from the sale of gas and electricity.

LESSONS FROM WOOL

A Comparison of These Industries in Canada And The States

The value of manufacturers wool in the United States in 1910 was \$507,000,000. The number of sheep in Canada in 1870 was 3,150,000 and in 1910 2,106,000, decrease of over 1,000,000. In the United States the number of sheep in 1870 was 27,731,600 and in 1910, 41,999,000. During that forty years the population of Canada doubled and that of the United States a little more than doubled. Canada had one sheep for each three head of population, but nine States of the United States had each more sheep than all of Canada. Montana in 1910 produced 33,000,000 pounds of wool. Alberta, right across the line produced only 400,000 pounds, though all declared that Alberta was quite as favorable for wool growing. The decline in sheep raising and woolen manufacturing had gone hand in hand.

Comparison of Looms

In 1899 there were 2645 woollen looms in Canada. But only 2034 in 1907, many mills having closed. The Canadian consumption of wool was 13,000,000 pounds and the United States, 574,000,000. Thus the United States used four times as much wool per capita as Canada in home manufactures. The product of Canadian mills was only \$12,000,000, while \$21,400,000 was imported. Thus, two-thirds of the wool consumed in Canada was imported. On the other hand, the United States produced \$380,000,000 out of \$400,000,000 consumed, or 95 per cent. of it. Three-fifths of the raw wool used in manufacturing in the United States was grown on the backs of United States sheep.

The investigation of the American Tariff Board covered 81 mills with over 5,000,000 spindles and 133,000 looms. Their finding after enquiring into conditions in Germany, England, France, Canada and Japan for purposes of comparison, stated that the English cost of converting wool into textiles was only 70 per cent. of ours, while the cost of erecting a mill in this country was 40 per cent. greater than in England, and equipment from 50 to 70 per cent. greater.

A Commission's Report.

Continuing, the Tariff Board made the following finding re Textiles:—"Except in the case of a few special fabrics, the American industry supplies practically the whole home consumption. Mill prices are in many cases as low in this country as in the world's markets. Where higher, as in the case of the finer classes of products, they are rarely higher by anything like the full amount of the duty. The effect of the present tariff, then, in most cases, is not so much to add the duty to the domestic manufacturer's price, as to secure him the American market; and in the case of most articles of widest consumption, to prevent the competition of the foreign manufacturer, either in normal or abnormal times. On account of more costly methods of distribution in this country from producer to consumer, the latter pays a decidedly higher retail price than the European consumer, even in the case of fabrics on which the cost of production and the mill price are as low here as there."

Yeoman Dashed to Death

Trooper Jack Mingy, aged twenty, employed at Crewe Railway Works, was killed while attending drill with the Earl of Chester's Imperial Yeomanry, encamped in Eaton Park, Cheshire, under the command of Mr. George Wyndham, M.P.

Mingy was engaged in manoeuvres with the machine-gun detachment when his horse bolted, carrying him into a belt of trees, where his head crashed against a bough.
